COMPAQ

Getting Started with the Online Documentation Library (ODL) CD–ROMs

AV–R63RP–TE

Dear Online Documentation Library Customer,

This COMPAQ OpenVMS™ Alpha ODL uses the Bookshelf Navigation Utility (BNU) V2.1 as the primary interface to online bookshelves. Bookshelves may contain books in either Bookreader™ or HTML formats. The BNU invokes the appropriate viewer to display each book.

The steps involved in installing the ODL and invoking the BNU, including example commands, are summarized below. The examples assume being in the system account, having CD–ROM reader devices of DKA400: and DKA500:, and installing the ODL comprised of the two CD–ROMs labeled AXPDOCSEP001 and AXPDOCSEP002. Note that particulars of the commands may vary according to your system configuration and version of the ODL to be installed.

1. Insert the ODL CD–ROMs into the CD–ROM readers and mount them.

```
$ MOUNT/SYSTEM/NOWRITE DKA400: AXPDOCSEP001
$ MOUNT/SYSTEM/NOWRITE DKA500: AXPDOCSEP002
```

2. Invoke the setup command to begin the ODL setup procedure, pressing "Enter" as needed to accept defaults for all options.

```
$ @DISK$AXPDOCSEP001:[SETUP]SETUP
```

3. If not already defined, define the Netscape symbol for ODL users (either in their login.com files or in SYLOGIN).

```
$ NETSCAPE == "$SYS$SYSTEM:NETSCAPE-EXPORT"
```

4. Log out and log in again.

5. Invoke the BNU.

```
$ BNU
```

For BNU System Requirements and Installation instructions, refer to the *Online Documentation Library CD–ROM User's Guide*, which is available online or in the [README] directory on Disc 1 of the ODL in the following formats:

[README]ODL_UG.PS	(Postscript®)
[README]ODL_UG.TXT	(Text)

® Compaq, the Compaq logo, and the DIGITAL logo are registered in the United States Patent and Trademark Office.

™ Bookreader, DIGITAL, and OpenVMS are trademarks of Compaq Computer Corporation.

® Postscript is a registered trademark of Adobe Systems, Incorporated. Netscape Navigator is a registered trademark of Netscape Communications Corporation.

Netscape Navigator®

If your existing installed version of Netscape Navigator is earlier than V3.03, the ODL V2.1 installation will remove it before installing the latest Netscape Navigator for OpenVMS (Navigator Gold V3.03). To obtain additional information regarding system dependencies for this upgrade, please refer to the following URL:

http://www.openvms.digital.com/openvms/products/ips/

Netscape Navigator documentation can be accessed from the Software Product Library CD-ROMs.

For further details, please read the ODL Release Notes located on disc 1 in the [README] directory.

Also included is the Compaq OpenVMS Alpha Online Documentation Library Promotional CD-ROM. This enables you to view the OpenVMS Alpha ODL locally on a PC running Microsoft Windows 95/98/2000 or NT 4.0. In addition to beta versions of the BNU and Bookreader software redesigned to run natively on MS-Windows, the ODL-PC incorporates AltaVista Search functionality.

The steps in installing the ODL-PC are as follows:

1. Insert the ODL CD-ROM into the CD-ROM reader.
2. View the "Readme.txt" file in the top level directory for important information before proceeding with the installation.
3. From the "Start" menu, select "Run...", and enter J:\Setup.exe, where J is the drive letter assigned to the ODL CD-ROM.
4. Respond to the setup program dialogs as desired and/or take the default responses by pressing <enter>.
5. After completion of the setup program, invoke the BNU from "Start/Programs/Compaq ODL /BNU".
